INTRODUCTION

Municipalities in the United States received $134.5 billion from all revenue sources and made expenditures totaling $128.7 billion in fiscal year 1983-84. Total revenue increased $9.4 billion or 7.5 percent and expenditure was $128.7 billion or 6.8 percent larger than the previous fiscal year.

General revenue of city governments, which excludes utility, liquor store, and employee-retirement amounts, was $104.9 billion in 1983-84 compared with $97.4 billion a year earlier.

General expenditure—i.e., spending other than for utility, liquor store, and employee-retirement purposes—totaled $97.0 billion in 1983-84, an increase of $6.4 billion from 1982-83.

Table 1 shows national totals on the finances of cities. Amounts shown pertain to municipal fiscal years which closed within the 12 months ending June 30 of the later year specified in the column heading.

Based on 1982 populations, table 2 presents the financial amounts for size groups while per capita figures are displayed in table 3.[1]

Table 5 presents statistics for cities and selected townships having 50,000 or more inhabitants in 1982, which are recalculated into per capita amounts in table 6. More detailed financial data for the 49 cities with a 1980 population of 300,000 or more are presented in table 7.

Table 8 summarizes utility finances by State and by type of utility (water, gas, electric, and transit systems). Detailed statistics of individual systems for cities over 50,000 population are presented in table 9.

GENERAL REVENUE

Since fiscal year 1975-76, city governments have received a greater share of general revenue from their own sources and a smaller share from revenues provided by other governments. The proportion of city own source revenue has increased despite a declining significance in property tax revenues (down from 25.6 percent in 1975-76 to 21.0 percent in 1983-84). During this period proportionate amounts for charges and miscellaneous revenue rose from 17.7 to 26.8 percent and nonproperty taxes increased from 16.6 to 20.7 percent.

As shown in table A, city-imposed taxes increased 9.0 percent from fiscal 1982-83 to $43.7 billion in fiscal 1983-84 or 41.7 per cent of all general revenue of city governments. Property taxation continued as the predominant tax revenue source, supplying $22.1 billion. Other municipal tax amounts, as shown in table 1, consisted of $7.6 billion from general sales and gross receipts taxes, $4.8 billion from selective sales taxes, $6.0 billion from income taxes, and $3.2 billion from licenses and miscellaneous other taxes.

[1] Size-class distributions of municipal governments, together with related 1980 population figures, are shown nationally and for States and metropolitan areas in the 1982 Census of Governments, Vol. 1, *Governmental Organization* (GC82(1)).

Municipalities received $20.5 billion from State governments in fiscal 1983-84. This, together with sums received directly from the Federal Government and from other local governments (mainly counties), made the total of city intergovernmental revenue $33.1 billion, or 31.5 percent of general revenue from all sources. Included in this total are $2.5 billion in general revenue sharing funds distributed by the Federal Government to municipalities under the State and Local Fiscal Assistance Act of 1972, as amended.

Sources other than taxes and intergovernmental revenue supplied $28.1 billion of municipal general revenue in fiscal 1983-84. This amount included $15.4 billion from current charges (other than for utility services, classed separately as utility revenue).

In August 1982, Washington, DC became the first city to operate a lottery. Its fiscal activity for fiscal year 1983-84 is shown below (in thousands of dollars):

Item	1983-84 amount
Income:	
Ticket sales (less commissions)	80,471
Apportionment of funds:	
Prizes	42,546
Administration	11,172
Proceeds available from ticket sales	26,753

GENERAL EXPENDITURE

As indicated in table B, police protection takes a larger share of city expenditure than any other function. Education is the next largest function, even though most of this spending is by the small fraction of municipal governments (including New York City and some other very large units) that directly administer local public schools. In most cities, public schools are administered by independent school districts, for which financial data are included in the report, *Governmental Finances in 1983-84* (GF84, No. 5).

EXPENDITURE BY CHARACTER AND OBJECT

Over seventy-one percent of all municipal expenditure in fiscal 1983-84 (including amounts for utilities, insurance trusts and governmental administration) was for current operation. Expenditure of this nature amounted to $92.2 billion. Expenditure for salaries and wages amounted to $45.3 billion in fiscal 1983-84, accounting for 35.2 percent of all municipal expenditures.

Capital outlay—mostly for construction, but also including spending for equipment and the purchase of land and existing structures—amounted to $18.8 billion, or 14.6 percent of all municipal expenditures.

Payments of interest on debt (including utility as well as general municipal debt) amounted to $8.1 billion, insurance benefits and repayments were $4.6 billion, and cash and assistance payments totaled $2.0 billion.

INDEBTEDNESS AND DEBT TRANSACTIONS

At the end of fiscal 1983-84, municipal indebtedness totaled $125.0 billion. The debt total included $43.1 billion of long-term indebtedness pledging the cities' full faith and credit, $76.5 billion of nonguaranteed long-term debt, and $5.3 billion of short-term debt. Debt figures shown include debt issued and retired during the 1984 fiscal year, and debt outstanding at the end of the fiscal year.

During fiscal 1983-84, municipalities issued $18.3 billion of long-term debt, including $4.0 billion for utility purposes. Their retirement of long-term debt during this fiscal year totaled $9.3 billion, including $2.3 billion of utility indebtedness.

As shown in table C, long-term debt is often nonguaranteed, i.e., obligations are payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes. The long-term debt shown below represents gross long-term debt less amounts reserved for future debt retirement, which are commonly referred to as long-term offsets.

CASH AND SECURITY HOLDINGS

The summary presented in table D shows financial assets of municipal governments. Financial holdings of municipalities amounted to $113.5 billion at the end of fiscal 1983-84. Assets of municipal insurance trust systems accounted for 42.8 percent of all financial holdings, including $48.6 billion employee-retirement assets and $27 million balance of Washington, DC's unemployment compensation system. Other major holdings by purpose included $19.1 billion for offsets to long-term debt, $10.1 billion as proceeds of bond issues held pending disbursement, and $35.6 billion representing holdings of all other city funds, including public trust and investment funds.

CITY UTILITIES AND LIQUOR STORES

Municipal governments commonly operate water supply systems and some of them also operate other utilities—electric power, gas supply, and local transit systems. Financial data for these various types of utilities are shown in tables 8 and 9.

City utility revenue in fiscal 1983-84 totaled $24.1 billion, including $7.5 billion for water supply systems and $12.5 billion for electric power systems. Utility expenditure amounted to $26.9 billion, of which $20.6 billion was for current operation, $4.3 billion was capital outlay, and the remainder was interest on utility debt.

Municipal long-term indebtedness for utilities at the end of the fiscal year amounted to $29.4 billion.

City-operated liquor stores are administered by certain municipalities in Alaska, Minnesota, North Carolina, and South Dakota. In 1983-84, municipal liquor stores in these four States had revenues and expenditures as follows (in thousands of dollars):

	Liquor stores revenue	Liquor stores expenditure
Alaska	495	374
Minnesota	127,696	122,047
North Carolina	106,622	91,772
South Dakota	21,159	19,328

FINANCES OF MUNICIPAL EMPLOYEE-RETIREMENT SYSTEMS

Municipal revenue in 1983-84 included employee-retirement revenue of $5.3 billion, consisting of employee contributions, earnings on retirement system investments, and State payments for employees covered by municipal systems.

Benefits and withdrawals paid by municipal retirement systems in 1983-84 totaled $4.5 billion, and their financial assets at the end of the fiscal year amounted to $48.6 billion, as shown in table 1.

The above figures pertain only to municipal-administered employee-retirement systems. They do not include amounts for State-administered systems—some of which provide coverage for municipal employees—or for the Federal program of Old Age, Survivors, Disability, and Health Insurance. Employer payments by participating cities to such other retirement programs are included here as a part of current operation expenditure.

SIZE GROUP STATISTICS

Financial statistics for various population-size groups of municipal governments appear in tables 2, 3, and 4. Figures for cities of less than 50,000 population represent estimates based on a random sample.

As evident by the functional detail in these tables, the relative financial scale of cities in the several size groups is strongly affected by the varying scope of municipal government responsibilities. In seven of the cities of over 300,000 population, public schools are operated by the municipal corporation rather than by an independent school district as is commonly the case. Furthermore, 14 municipalities within this size group (including 10 of the 24 cities with more than 500,000 inhabitants) are, in effect, composite city-county governments. Nearly all smaller municipalities, on the other hand, are located in areas which are served by a separate county government.

INDIVIDUAL MUNICIPAL DATA

Table 5 is a presentation of financial statistics for 465 cities and selected townships having 50,000 inhabitants or more in

1982. The cities are arranged alphabetically by State. Per capita amounts for selected financial items appear in table 6. Any intercity comparisons based upon these figures should be made with caution, recognizing the variations that exist among urban areas in the relative role played by the municipal corporation, as discussed below under "Coverage and Limitations of Data."

Tables 5 and 6 also supply data for major town and township governments in certain States where such governments are similar to cities in organization and local services provided. These governments can be distinguished from municipalities by the fact that their designation in each instance includes the term "town" (for Connecticut and Massachusetts units) or "township" (for New Jersey and Pennsylvania units). The municipal aggregates presented in tables 1 to 4, however, include no amounts for township (or "town") governments.

Table 7 provides a more detailed array of financial information for each of the 49 municipalities of at least 300,000 inhabitants in 1980.

COVERAGE AND LIMITATIONS OF DATA

Data in this report relate only to municipal corporations and their dependent agencies, and do not include amounts for other local governments overlying city areas. Therefore, expenditure figures for "education" do not include spending by the separate school districts which administer public schools with most municipal areas. Variations in the assignment of governmental responsibility for public assistance, health, hospitals, public housing, and other functions to a lesser degree, also have an important effect upon reported amounts of city expenditure, revenue, and debt.

Data presented in this publication are statistical in nature and do not represent an accounting statement. Therefore, a difference between an individual government's total revenues and expenditures does not necessarily indicate a "budget" surplus or deficit.

The 1983-84 fiscal years reported are those which closed between July 1, 1983, and June 30, 1984. A majority of municipalities end their fiscal years on December 31; the next most common financial period is the 12 months ending June 30. Data for Washington, DC is for the fiscal year ending September 30, 1984.

The financial statistics reported here are based mainly on a mail canvass that covered substantially all cities with 1980 estimated populations of 25,000 or more. Estimates for minor revenue items, expenditure, debt, and cash and security holdings were developed from data received from a scientifically designed sample of city governments below that population size. As a result, the data covering the total of all cities are subject to some sampling variations. Calculations of the relative standard error of these estimates indicate that for major items it is less than 1 percent (at the two-thirds confidence level).

For the 49 cities with 300,000 inhabitants or more and for a limited number of smaller cities, the basic data were compiled by Census Bureau representatives from official reports and records, with the advice and assistance of local officers and employees. Information for other cities was supplied by local officials in response to a mail canvass that involved the use of detailed census questionnaires. The mail reports were examined intensively, and followup correspondence was used to supplement and verify questionable figures.

Data for municipalities between 25,000 and 50,000 population, selected sample jurisdictions, and certain unpublished financial items can be obtained from Census Bureau data files. For further information, contact Chief, Governments Division, Bureau of the Census, Washington, DC 20233.
